

- Dust and sweep marble surfaces regularly to remove dirt and debris.
- Use a damp cloth or mop to clean marble surfaces, and avoid using abrasive sponges or scrubbers.
- Use a pH-neutral cleaner designed specifically for marble to clean and disinfect surfaces. Avoid using acidic or abrasive cleaners, as they can damage the marble.
- Wipe up spills immediately to prevent stains, and be especially careful with acidic substances like citrus juice or red wine.
- Use coasters or placemats under items that can scratch or stain the marble.
- Seal marble surfaces to protect them from staining and damage. You may need to reseal the marble periodically, depending on the level of traffic.
- Have professional marble restoration work done when necessary, such as polishing, honing, or re-grouting, to keep the marble looking beautiful.
- Careful when moving heavy objects over the marble surface to avoid scratches or cracks.
- Avoid exposing marble to direct sunlight for extended periods, as it can cause discoloration and fading.
- Regularly inspect your marble surfaces for cracks, chips, and other signs of damage and address them promptly.

By following this checklist and taking proper care of your marble, you can keep it looking beautiful for many years. Be sure to also consult with JKMM or your marble supplier for any specific instructions on maintaining the marble surface in your possession.
